

Data-driven E-Commerce: Connect your data, build pipelines and gain greater visibility over customer behavior

We remove the effort required for build-it-yourself stacks and repetitive tasks, so you can focus on the objective: working with the data and extracting value.

All data integrations you'll ever need in place

Over 250+ integration

With Keboola, you'll achieve:

23% increase in sales

234% increase in data engineer productivity

73,2% decrease in time to market for new products

Connect data in a few clicks

more than 250 out-of-the-box data source and destinations integrators. Our ever-growing library already offers all of the major integrations.

ADVERTISING

Integrate data from any advertising channel - you name it, we cover it. Think Google Ads, Facebook, LinkedIn, Snapchat, and even Bing.

ANALYTICS

Retrieve and send data about your project or your whole organization and monitor your activities with all of the major analytics integrations and telemetry data.

WEATHER, NLP, COMPETITOR SCRAPING...

...and everything else you need to build sales prediction models and optimize your process

Come for the ETL, stay for the whole stack

ETL, ELT, reverse ETL - we cover them all. Build extract-transform-load pipelines in minutes, then add use cases as and when needed. There's no need to invest and manage different tools.

RUN TRANSFORMATIONS IN SQL, PYTHON OR R

With our powerful transformation engine, you can set up transformations in your code of choice and automate its execution. It comes with built-in version control.

BUILD AND DEPLOY NEW INTEGRATIONS EASILY

Retrieve and send data about your project or your whole organization and monitor your activities with all of the major analytics integrations and telemetry data.

NO-CODE DATA PIPELINE AUTOMATION

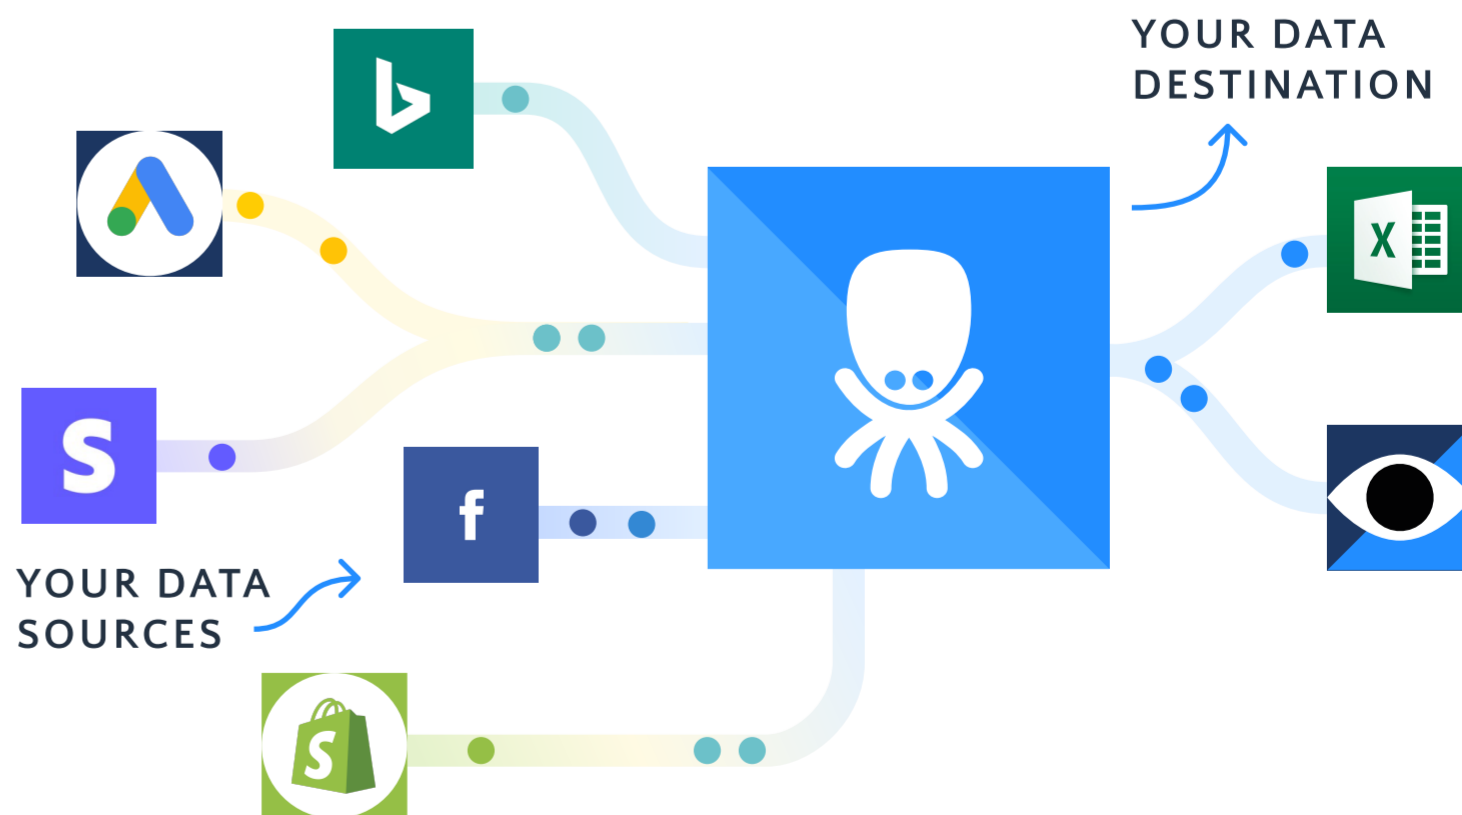

Schedule data collection or loading without having any skills in coding. Connect sources and destinations once and leave them running.

User management, data lineage, version control...

...and everything else you need for running a data-driven business in one tool. No need to switch platforms and hire additional manpower.

Ready to go data stack

- ✓ Data Acquisition - Extractors
- ✓ Transformations - SQL, Python, R
- ✓ Data Catalog
- ✓ Data Science Workbench
- ✓ Data Delivery - Writers
- ✓ Process Automation & Monitoring
- ✓ Version Control
- ✓ User Management
- ✓ Perimeter Security (SOC2)

Here's what others say about Keboola

We just discovered Keboola a few days ago, but it has already filled a huge gap in our data stack. I anticipate us migrating most of our data automations to Keboola in the coming months.

Jordan Burger
Data Analyst at ASCEND

Keboola took a significant amount of pain out of not only better managing our data, but using it to our advantage for removing bottlenecks in our systems and creating better data people within our company.

Ilja Volf
Head of Data Analytics and BI at MALL GROUP

With Keboola, we were able to open up data, simplify an increasingly complex data environment, and speed up the time from ideas to tangible results.

Tomáš Čupr
Performance Marketing Group CEO at Rohlik.cz
